Welcome to NC Quick Pass! You are now one step (well, actually three steps) closer to enjoying savings of up to 35% on tolls in North Carolina!

1. Determine the correct front license plate mounting location on your vehicle and remove any screws.

2. Position the transponder so that it is within 18 inches (46 cm) of the center of the front bumper as shown in the figure below.

3. Align the holes on the transponder with the holes on the vehicle’s mounting location and fasten the transponder to the vehicle.

Line up holes in exterior transponder baseplate to license plate mounting location.

Need help? Please visit an NC Quick Pass Customer Service Center, and a representative will be happy to verify the proper installation and operation of your transponder.
