Welcome to NC Quick Pass! You are now one step (well, actually three steps) closer to enjoying savings of up to 35% on tolls in North Carolina!

Your new NC Quick Pass transponder must be placed on the external headlamp. Follow the instructions below to ensure its proper operation. It is recommended to clean and dry the exterior surface prior to installing your transponder.

1. Determine the correct location for your transponder. It should be installed horizontally on either the left or right headlamp (or center headlamp for motorcycles), as close to the center of the vehicle as possible.

   Use the diagram below as a reference guide.

2. Remove the portion of the transponder below the dotted line.

   It is recommended to keep the portion of the transponder below the dotted line for your records.

3. Carefully remove transponder from the liner and place on the headlamp in the appropriate location.

   Once installed, the transponder cannot be removed without damaging it.

Need help? Please visit an NC Quick Pass Customer Service Center, and a representative will be happy to verify the proper installation and operation of your transponder.
